

eGurukul

AI Spiritual Guruji for Temples, Ashrams & Spiritual Institutions

From a bell that rings, to a Guruji that speaks, teaches and reaches millions.

Powered by Roboticbell AI + Meghavani Voice Broadcasting

■ RING Scheduled bells & mantras	■■ TEACH AI Guruji daily content	■ GUIDE Satsang & scripture learning	■ BROADCAST Reach devotees on smartphones
--	--	--	---

1. Intelligent Spiritual Bell

eGurukul retains the proven Roboticbell foundation: a programmable, connected spiritual audio system that can automatically operate the institution's PA system at preset times.

<i>Scheduled Bell & Mantra</i>	Automatically play temple bells, mantras, stotras, prayers, aarti, suprabhatham and other prerecorded spiritual audio.
<i>Flexible Daily Timetable</i>	Create different schedules for weekdays, weekends, festivals and special occasions.
<i>Prayers at Preset Times</i>	Build a consistent spiritual rhythm for the temple, ashram, mutt, yoga centre or institution.
<i>Custom Audio</i>	Use the institution's own recordings, voices, announcements and devotional programmes.

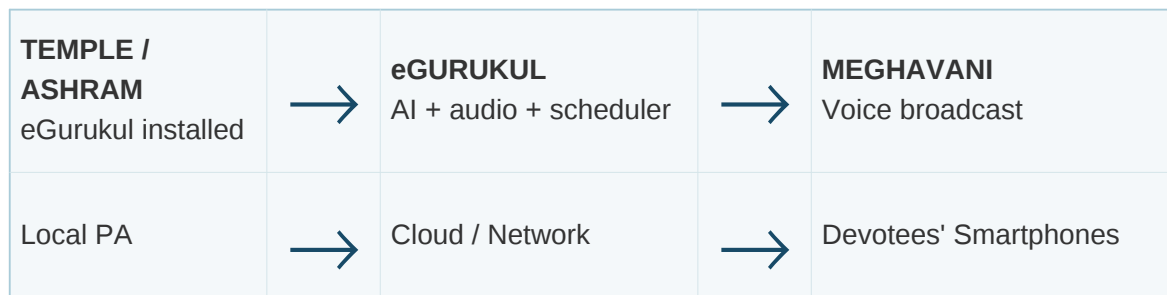

2. AI Guruji — A New Generation of Spiritual Communication

The AI Guruji transforms eGurukul from an automatic bell into an always-available spiritual content system. It can prepare regular programmes and intelligently mix AI-generated speech with curated prerecorded voices and devotional audio.

Daily Spiritual Messages	Morning blessings, motivational messages, gratitude, values and reflections.
Scripture Satsang	Bhagavad Gita, Ramayana, Mahabharata and other approved spiritual topics.
Prayer & Meditation	Guided prayers, meditation, peace messages and contemplative sessions.
Awareness Programmes	General health awareness, cleanliness, environment, social responsibility and community messages.
Festival Content	Special programmes for festivals, temple celebrations and important spiritual occasions.
Stories & Wisdom	Moral stories, traditional wisdom and short teachings suitable for different audiences.

3. Meghavani Integration — From Temple to Millions

With Meghavani integration, the spiritual programme can extend beyond the physical premises. A temple or ashram can broadcast selected bell events, prayers, announcements or live audio to followers on their smartphones.

Typical Meghavani-enabled experiences

- **Every morning:** Temple bell + prayer can be broadcast to subscribed devotees.
- **Every evening:** Aarti or devotional programme can reach followers wherever they are.
- **Live Satsang:** A human Guruji can speak live to the temple audience and remote followers.
- **Important announcements:** Festivals, events, timings and community messages can be distributed by voice.
- **Special occasions:** A temple can create a large digital spiritual audience without requiring devotees to be physically present.

4. AI Guruji + Human Guruji

<i>AI Guruji Mode</i>	Automatically prepares and delivers scheduled spiritual content when no human speaker is available.
<i>Human Guruji Mode</i>	A priest, Guruji or authorized operator can take over for live talks, satsangs and special announcements.
<i>Hybrid Mode</i>	AI-generated segments, prerecorded devotional audio and live human speech can be combined into one programme.

5. A Complete Spiritual Communication Platform

eGurukul is designed as a platform rather than a single-purpose bell. It brings together automated audio, AI-generated spiritual communication, live human participation and smartphone broadcasting.

<i>For Temples</i>	Automate daily spiritual routines, improve announcements and extend temple communication to devotees beyond the premises.
<i>For Ashrams & Mutts</i>	Create regular satsang, teaching and prayer programmes while preserving the voice and content of the institution.
<i>For Devotees</i>	Receive meaningful spiritual audio and live programmes on smartphones, wherever they are.
<i>For Communities</i>	Use the voice network for awareness, social responsibility, festival and community programmes.

6. Example: One Day with eGurukul

06:00	Suprabhatham + Temple Bell	Local PA + optional Meghavani broadcast
07:00	Morning Prayer	AI Guruji + devotional audio
09:00	Thought for the Day	AI Guruji
12:00	Mantra / Midday Prayer	Scheduled audio
18:00	Evening Bell + Aarti	Local PA + optional smartphone broadcast
19:00	Gita Satsang	AI Guruji or live Guruji
21:00	Shanti / Night Prayer	Scheduled spiritual programme

THE VISION

Every temple can have a digital voice.

Every bell can become a message. Every prayer can become a shared experience. Every Guruji can reach devotees beyond the temple walls.

RING. TEACH. PRAY. BROADCAST.
